Textile & Garment Conference

&

Exhibition

INTRODUCTION

Textile, any filament, fibre, or yarn that can be made into fabric or cloth, and the resulting material itself. The term is derived from the Latin *textilis* and the French *texere*, meaning "to weave," and it originally referred only to woven fabrics. It has, however, come to include fabrics produced by other methods. The textile industry is primarily concerned with the design, production and distribution of textiles: yarn, cloth and clothing.

Garments are any garments intended for use in the human body which is made of fabrics or other textile materials. The fabric is made more attractive by adding different design patterns etc. on the fabric. In other words, it is also called readymade garments. three-day exhibition, it welcomed a total of 15,893 professional buyers from both domestic and international markets.
